BMWofAnnapolis.com

If you're looking for a well-rounded luxury SAV, the 2019 BMW X3 is a viable option. That's because it boasts a great deal of style, power, and advanced features.

Plus, it's available in three trim levels:

- sDrive30i
- xDrive30i
- M40i

Each one has a great deal to offer, which is why we created this *BMW X3 Trim Level Guide*. Below, we'll break down the characteristics of each trim, so that you can better decide which one is right for you.

Keep reading to learn all about them, then contact your nearest BMW dealership to see them in person.

Distinctive Exterior Design

The 2019 BMW X3 has an interesting look to it, in that it's both sophisticated and rugged. No matter which trim level you opt for, you'll have three distinct body styles to choose from:

- **xLine:** It comes with 18-inch Y-Spoke wheels along with satin aluminum bumper add-ons and rocker panels.
- **Luxury:** High-gloss chrome accents highlight the vehicle's body from grille to tailpipe.
- **M Sport:** You get larger M Double-spoke wheels, high-gloss roof rails, and a Shadowline exterior trim—making it look like a true high-performance machine.

Additionally, this automobile is available in a wide variety of colors, including Phytonic Blue Metallic and Dark Graphite Metallic. No matter which body style and color you opt for, you'll have an SAV that's sure to stand out on the road.

2019 BMW X3 sDrive30i

The BMW X3 sDrive30i may be the base trim, but it comes with lots of features for an enjoyable driving experience.

Performance Specs

For one, you have an impressive performance with the 2.0L TwinPower Turbo 4-cylinder engine. It delivers 248 horsepower and 258 lb-ft of torque—plenty of muscle for city or highway driving.

The vehicle is quite fuel-efficient, too, achieving an EPA-estimated 23 city/30 highway MPG. As a result, you could spend hours on the road before having to stop and refuel.

Furthermore, this trim lets you customize your overall driving experience. With Driving Dynamics Control, you have three modes to choose from:

- ECO PRO
- COMFORT
- SPORT

Whether you want to focus on performance, efficiency, or a mix of both, you can with this feature.

Interior Space & Amenities

The X3 sDrive30i offers plenty of room for five people, with 40.3 inches of front leg room and 36.4 inches of rear leg room. Plus, you have 28.7 cubic feet of cargo room behind the rear seats, which expands to 62.7 cubic feet when that row is folded down flat. With all this room, you can fit as many people or items into the SAV as needed.

In addition to the spacious interior, this trim level offers lots of impressive amenities. One of them is a 10-way power sport seat for both the driver and front passenger. It includes a memory system for the driver, making it easier to trade off driving duties with another person.

You also get a 3-zone automatic climate control system in this trim. With this feature, you, your co-pilot, and the people in the back can individually adjust the cabin temperature. So, if you like it warm while everyone else prefers being on the cooler side, this system can keep everyone happy.

Cutting-Edge Technologies

The iDrive 6.0 infotainment system in the sDrive30i is what houses all your media options. This includes HD Radio™, which gives you clearer AM/FM reception. It also provides extra stations, so that you have even more entertainment options.

The vehicle's technologies not only help keep you entertained, but they can help you safe, too. That's because it comes with a suite of driver-assisting technologies. Included in this suite are features like:

- Active Guard with Frontal Collision Warning
- Automatic City Collision Mitigation & Braking with Daytime Pedestrian Detection
- Speed Limit Information

With these systems in place, you can have peace of mind knowing that the X3 has your back.

BMW X3 xDrive30i

Next up in the 2019 BMW X3 trim level lineup is the xDrive30i. This version offers the same amount of cabin space as the sDrive30i. However, things change a bit when it comes to specs and features.

Performance Specs

The xDrive30i actually offers the same engine as the previously mentioned trim. However, fuel economy varies slightly, at an EPA-estimated 22 city/29 highway MPG.

Additionally, while the previous trim comes in rear-wheel drive, this one comes in all-wheel drive (AWD).

The xDrive AWD system works alongside Dynamic Stability Control to continuously monitor road conditions. If wheel slip is detected, the system will redistribute torque between the front and rear wheels. This is so you can get maximum traction on even the slickest surfaces.

Interior Design & Features

Like the sDrive30i, the xDrive30i comes with SensaTec upholstery and a Dark Oak Wood interior trim. This gives the BMW a refined look and feel to it, especially when you opt for one of the following seating colors:

- Black SensaTec
- Canberra Beige/Black SensaTec

As far as features go, they're pretty much the same as the previous trim. This includes technologies like Bluetooth®, making it easy to stream audio or make phone calls with your hands on the wheel and your eyes on the road ahead.

It also includes a 12-speaker Hi-Fi Sound System. With this feature, all your media options will be heard clearly for your listening enjoyment.

X3 M40i

Finally, you have the 2019 X3 M40i trim. It's here that your performance specs and features are kicked up a notch, to help further elevate your daily commute.

Performance Specs

The M40i comes with a 3.0L V6 engine that churns out 355 horsepower and 365 lb-ft of torque. While it offers slightly more power than the previous trims, it still comes with an 8-speed STEPTRONIC automatic transmission.

This feature delivers smooth and seamless shifting. Plus, the Sport and Manual shift modes give you more control on the road, for a more thrilling ride. This is especially the case, when you consider that the vehicle can go from 0-60 MPH in just 4.6 seconds!

However, this kind of power doesn't compromise the SAV's fuel efficiency. In fact, this trim achieves an EPA-estimated 20 city/27 highway MPG—which still helps you drive farther for longer.

Interior Design & Amenities

Like in the previous trims, the M40i comes with SensaTec upholstery but is available with leather seating. If you decide on leather seats, you'll get to choose between colors like:

- Mocha Vernasca Leather w/ contrast stitching/piping
- Black Vernasca Leather w/ blue contrast stitching/piping
- Oyster Vernasca Leather w/ contrast stitching/piping

Plus, you get an Aluminum Rhombicle interior trim—giving the vehicle a cool look and feel to it. Adding to that look is Ambient Lighting, which includes illuminated vanity mirrors and reading lights in the front and back. So, even at night, you'll be able to see through every part of the automobile.

Amenities get upgraded a bit in this trim, as well. For example, you now have 14-way power front seats—making it easier than ever to get comfortable behind the wheel.

Cutting-Edge Technologies

Many of the tech features mentioned before are included in the M40i, like BMW Assist eCall™. This comes with options like Emergency Request. You simply press an SOS button on the vehicle and help will get to you as soon as possible. It also comes with Enhanced Automatic Collision Notification. If you get into an accident, a dispatcher can use GPS to pick up your exact location, so that first responders know where to go.

However, this trim does add a bunch of new technologies, like a 1-year All Access subscription to SiriusXM® Satellite Radio. With this feature, you get over 150 music, news, comedy, and sports stations to selection from. As a result, you'll have an easy time finding something new and fun to listen to.

Optional Features

Each BMW X3 trim level provides features through optional packages. You'll find those through the following tiers:

- **Convenience Tier:** Comes with Comfort Access, which lets you lock, unlock, and open the doors while keeping your keys inside your purse or pocket.
- **Premium Tier:** You get heated front seats and a heated steering wheel to stay extra cozy on cold nights. Plus, a full-color Head-up Display shows current speed, turn-by-turn directions, and more on the front windshield, for your convenience.
- **Executive Tier:** With this tier, you get Gesture Control. Simply move your finger to operate selected functions like changing the radio volume or answering phone calls.

There's also the optional Driver Assistance Plus Package. This comes with even more advanced safety options to help protect you and your loved ones. One of those features is Active Cruise Control with Stop & Go. You set a specific distance from the car in front of you, and the system will continually monitor traffic. It'll then automatically slow or stop your BMW if needed to help maintain that preset distance.

Test Drive a 2019 BMW X3

Above are just some of the many features found inside each 2019 BMW X3 trim level. To learn more, and see them in person, schedule a test drive at your local BMW dealership. Take each trim for a spin, and you'll find your ideal fit in no time!
