When you decide to get behind the wheel of a new luxury vehicle, you'll notice you have a lot of options available to you. If one of your top contenders is the 2020 BMW X5, then you've come to the right place. In this guide, we'll break down everything there is to love about this SUV, from its sports-car-inspired M Performance engine to its interior dimensions.

The X5 is the perfect match for drivers looking for supreme performance combined with protection for the whole family and an impressive amount of cargo space. If you have any questions along the way about this SUV or would like to experience its top-notch interior firsthand, reach out to your local BMW dealer.

## 2020 BMW X5: Engine Options and M Performance

The BMW X5 gives a whole new definition to a family vehicle. Under the hood, you'll have three powertrain options to choose from, each delivering a superior blend of power sure to invigorate your morning drive to drop the kids off at school. The M Performance engine takes it to the next level with the heart and soul of a sports car in the roomy SUV body you desire.

### Your Choice of High-Powered Engines

No two people are the same, so the 2020 BMW X5 offers two motor options and a performance engine to delight a wide array of drivers. Kicking off this lineup is a 3.0L TwinPower Turbo inline 6-cylinder engine, which churns out 335 horsepower and 330 lb-ft of torque for a truly daring drive. Want to take it up a notch? The available V8 motor generates 456 horsepower and 479 lb-ft of torque for quicker accelerations and smoother driving dynamics.

No matter which powertrain appeals to you, you can equip it with available xDrive for greater stability. This advanced all-wheel drive system offers support when powering around twists and turns on the open road as well as additional road grip when needed to cruise through heavy rain or thick snow.

### The M Performance Difference

While the previous two powertrain options are appealing, drivers with the spirit of racing in their blood will prefer what the BMW X5 M50i has to offer. Under the hood, this athletic trim packs a 4.4L M Performance TwinPower Turbo V8 engine mated to an M Sport exhaust system for a more aggressive drive with heightening shifts and power. The 523 horsepower and 553 lb-ft of torque delivered by this motor combine to help take you from 0 MPH to 60 MPH in just 4.1 seconds—a truly unforgettable ride.

Every aspect of the X5 M50i is crafted with the soul of a race car in mind. An M sport steering wheel puts you in the cockpit while available 22-inch wheels announce your arrival on the highway. What truly makes this trim stand out from the crowd is its Adaptive M Suspension. Specially constructed for enhanced control and sharper handling, it's mated to paddle shifters that put the power of the 8-speed Sport Automatic transmission directly at your fingertips.

## 2020 BMW X5: Interior Space and Amenities

The graceful yet commanding performance of the BMW X5 is more enjoyable thanks to its expansive and premium interior. True to a luxury brand, high-end materials—like available Merino leather upholstery and Glass Controls—are used throughout the cabin. Comfort features are strategically placed to create a more supported and relaxing drive.

### Comfort for the Whole Family

The cabin measurements of a vehicle help to create a complete picture of the type of comforts you'll be able to enjoy. More headroom and legroom mean more space to stretch out during long treks, while ample shoulder room allows all five passengers to be seated comfortably. Fortunately, the X5 delivers with the following dimensions:

- **Headroom:** 40.7 inches
- **Front Legroom:** 39.8 inches
- **Rear Legroom:** 37.4 inches
- **Front Shoulder Room:** 60 inches
- **Rear Shoulder Room:** 58.1 inches

Have a larger family? Luckily, the BMW X5 offers an available seat to increase your seating capacity to seven passengers.

Whether your kids need space for their art projects and backpacks or you need room for luggage for a weekend excursion, this SUV has space for all your necessities. When the rear seats are upright, you'll be treated to 33.9 cubic feet of room. If you need more space, fold the rear seat flat to gain a maximum of 72.3 cubic feet of space—perfect for larger purchases.

A standard power split tailgate makes accessing all your cargo easier than ever. Since it opens with a touch of a button, there's no need to juggle your groceries and shopping bags. The rear will seamlessly open and even split for the ultimate convenience.

### **Enhanced Comfort Throughout Your Ride**

For even greater driving support, opt for the available 20-way power Multi-contour front seats. They offer an array of seating positions to help melt stress and fatigue away when you're running your kids around to after-school activities.

Even chilly mornings will be more enjoyable with Remote Engine Start. Activate this system to get your engine running, even when you're still in your cozy bed, to create a more inviting cabin when you climb in. Heated front seats in the 2020 BMW X5 will then work to keep you comfy throughout the ride. They offer three stages of warmth, so you can choose the best setting to combat the winter blues.

## 2020 BMW X5: Advanced Technology

BMW has consistently been on the forefront of advanced technology and the X5 follows in the same footsteps. From entertainment systems designed to keep your entire cabin engaged throughout your journey to features to help you keep your eyes focused on the ever-changing road, this SUV is equipped with advanced technology features.

### Entertainment Wherever You Roam

The BMW Live Cockpit Professional places a 12.3-inch Dynamic Digital Instrument Cluster behind your steering wheel. With this unique system, you can view essential driving information easily! The 12.3-inch iDrive 7.0 system in your center console gives you quick access to an array of entertainment settings as well.

Use this central display to access an array of smartphone applications through Apple CarPlay® compatibility. Simply plug your compatible device into the USB port and you'll be able to choose curated playlists or catch up on the next chapter in your audiobook.

### Complete Control with the Sound of Your Voice

For complete hands-free control, the BMW Intelligent Personal Assistant comes to life when you say "Hey, BMW." Your personal assistant will act as your co-pilot. It'll chart courses to your next out-of-town business meeting, find the closest gas station to you, and integrate with your personal calendar to keep you on time to your appointments.

This feature can also adjust your cabin temperature, so you don't have to fiddle with any controls when exploring the open road. Even servicing your X5 is easier with this intuitive technology. Simply ask it, "Hey, BMW, check my oil level," and you'll be instantly updated to your SUV's maintenance needs.

## 2020 BMW X5: Safety Features

A family SUV isn't complete without the proper security features designed to keep everyone in your cabin protected. In the event of a collision, the BMW X5 is prepared with three-point safety belts, an Anti-lock Braking System, and a front and rear Head Protection System with side-impact airbags. While these systems will keep you secure when the unimaginable happens, it's the top-of-the-line technology armed on the X5 truly making this ride safe.

### Protection as a Top Priority

No matter which engine and trim appeals to you, the X5 wants to keep you safe on the ever-changing highway. Coming standard is an Active Protection System, which prepares your car by tensioning the seatbelts, closing the windows and moonroof, and activating post-crash braking if a collision seems imminent.

- Active Blind Spot Detection
- Lane Departure Warning
- Daytime Pedestrian Protection
- Frontal Collision Warning with City Collision Mitigation
- Rear Cross Traffic Alert

These features will detect and alert you to nearby obstacles and potential collisions, helping you make the necessary changes to keep your little ones safe throughout the ride.

### **Stay Fully Protected Wherever You Roam**

The BMW X5 expands upon its standard safety with a range of packages to help you personalize your security to your individual needs. The Driving Assistance Professional Package is perfect for combating daily commutes with Active Cruise Control with Stop & Go. This smart system maintains a set following speed and distance between you and the car ahead, allowing you to sit back and relax more as your SUV keeps up with the flow of traffic automatically.

If you need a hand when parking, opt for the Parking Assistant Package. With it, you'll get Parking Assistant, a system that finds a parking spot and steers you securely into it. Even complex parallel parking maneuvers will be simplified with this state-of-the-art technology.
