BUYER'S GUIDE TO THE 2019 BMW X3

An SUV with lots of power, comfort, and features might sound appealing to any driver. One such vehicle is the X3, with an athleticism that rivals many sports cars and a style that's comparable to many luxury models on the road.

We want to tell you all about this luxury compact SUV, which is why we created the *Buyer's Guide to the 2019 BMW X3*. Keep reading to see what this automobile has to offer, starting with its impressive-looking exterior!

DISTINCT BODY STYLES FOR THE 2019 X3

The 2019 BMW X3 is a force to be reckoned with, which comes from its commanding appearance.

The vehicle has three specific body styles you can choose from:

- **xLine:** It comes with 18-inch Y-Spoke wheels along with satin aluminum bumper add-ons and rocker panels.
- **Luxury:** High-gloss chrome accents highlight the body of the vehicle, from the grille to the tailpipe.
- **M Sport:** You get a Shadowline exterior trim, high-gloss roof rails, and larger M Double-spoke wheels.

In general, the X3 offers a bold and dynamic design, combining rugged looks with the sophistication of a luxury model.

The front fascia has a muscular, 3D-like kidney grille along with fog lights that have a hexagonal design. In the back, you have taillight housings with a 3D look. These rear lights, combined with the available Icon Adaptive LED headlights, give the SUV a real visual impact.

Shopping for a new vehicle is easier, too, because there are so many options to choose from. Do you want a white SUV with heated seats and navigation? With so many makes, models, and trims out there, you can find your ideal automobile in no time.

REFINED INTERIOR DESIGN

The impressive appearance of the 2019 X3 continues inside, where you'll find hexagonal forms and precise, sloping edges.

SensaTec (or leatherette) upholstery comes standard, while leather seating is available. Plus, you'll have an Anthracite headliner along with either a Dark Oak Wood or Aluminum Rhombicle interior trim.

With interior materials of the highest quality in addition to thought-out ergonomics, this BMW model was built with every driver and passenger in mind—and this is true for passenger and cargo room, too.

PASSENGER & CARGO ROOM

The BMW X3 gives five people plenty of room to stretch out, as shown by the following interior dimensions...

- **Front headroom/legroom:** 41.1 inches/40.3 inches
- **Rear headroom/legroom:** 39.1 inches/36.4 inches
- **Front seat volume:** 55.2 cubic feet
- **Rear seat volume:** 46.2 cubic feet

With this kind of space, you can expect everyone on board to stay comfortable throughout even the longest drives.

You'll also have plenty of room to store shopping bags, luggage, and other personal belongings. Inside, you get 28.7 cubic feet behind the rear seats and 62.7 cubic feet when that row is folded down.

Not only is the cargo area quite big, but the entire area is usable and convenient, too. In fact, there's a small hidden space under the trunk floor, where you can store more valuable items. They won't get knocked around, and you'll keep them hidden from any prying eyes.

AMENITIES INSIDE THE BMW X3

The 2019 BMW X3 then has many interior features that can keep everyone happy. For starters, 10-way power front seats come standard, while 14-way power front seats are available. With either option, you should have no problem getting into that ideal seating position for all-day comfort.

For more comfort, the BMW X3 also has the following available features:

- **Heated and ventilated front seats**
- **Heated rear seats**
- **Heated steering wheel**

As the temperature outside changes, these features can let you cool down or warm up quickly with just the touch of a button.

Plus, everyone inside the vehicle can have their ideal cabin temperature thanks to the standard 3-zone automatic climate control system. You, your front passenger, and those in the back have individual settings to adjust the temperature so it's just right.

USER-FRIENDLY TECHNOLOGIES

You'll also be happy with the high-tech features found inside 2019 X3. The focal point is the standard iDrive 6.0 infotainment system. You'll find all your media options on this infotainment center, which can be accessed through the control knob, voice command, or the available gesture control. With just the swipe of a finger, you can adjust the volume, answer phone calls, or set custom controls.

HD Radio™ comes standard, so you have more listening options beyond the standard AM/FM radio. Plus, your music can be heard clearly through the standard 12-speaker sound system.

If that's not enough, there's an available 1-year All Access subscription to SiriusXM® Satellite Radio, as well. With over 150 music, news, sports, and comedy stations to choose from, you'll always find something new to listen to.

iPhone users may appreciate the available Apple CarPlay™ feature. To use, plug your phone into the vehicle's USB port, where various apps will appear on the 8.8-inch or 12.3-inch display screen. You can then access your favorite apps through the vehicle, such as podcasts and text messages. With this system, you can still use your phone without touching it while driving.

Speaking of your phone, don't worry about bringing your charger with you all the time. With the available wireless charger, simply place your mobile device on the pad and never run low on battery power again.

We haven't forgotten about the rest of the passengers. In fact, we're sure everyone would be happy with the available onboard Wi-Fi hotspot. With that and 3GB of data included free for three months, up to 10 mobile devices can easily connect to the internet, no matter where you travel.

SAFETY FEATURES FOR YOUR PEACE OF MIND

Then, there are the safety options in the BMW X3 that are designed to give you great peace of mind. One of them is the optional Head-up Display. Important info will appear behind the steering wheel on the windshield, such as:

- **Current speed**
- **Speed limit**
- **Turn-by-turn directions**

With this feature in place, all the vital data will be right in your line of sight, so you don't need to look away for even a second.

If you happen to get into a collision, the vehicle will help protect everyone on board through the advanced airbag system. From the front airbag supplemental restraint system to the seat-mounted front side-impact airbags, you can rest assured that the X3 will work hard to keep you and your loved ones safe.

The vehicle also comes standard with BMW Assist eCall™, which includes Emergency Request (SOS button) and Enhanced Automatic Collision Notification. If an accident has occurred, you can rest easy knowing that help will be on the way.

DRIVER-ASSISTING TECHNOLOGIES

What's also impressive about the 2019 X3 is that it offers many driver-assisting technologies. These features act as a second pair of eyes, alerting you to hazards you might miss on the road, so you don't get into an accident.

A standard safety system in the BMW X3 is Frontal Collision Warning with City Collision Mitigation. It'll warn you if you're getting too close to a car. Then, if it senses that a collision is imminent, it can apply the brakes for you if you're not able to do so in time.

An available safety feature is Active Cruise Control with Stop & Go. It acts as your standard cruise control system, maintaining a set speed. However, it also helps you keep a safe distance from the car in front of you. In fact, if traffic ahead begins to slow down, the system can automatically slow the X3 down for you.

Another useful feature that's available is an Active Lane Keeping Assistant with Side Collision Avoidance. It'll work to keep the vehicle in the center of your lane when traveling at highway speeds. If you start to drift to the left or right, the system can automatically apply steering inputs to help guide you away from danger.

POWERFUL PERFORMANCE SPECS

The last part of the X3 we'll touch on is its performance. It has everything you could want in an SUV, such as:

- **Energetic engines**
- **Athletic handling**
- **Smooth ride**
- **Great fuel economy**

The vehicle comes standard with a 2.0L TwinPower Turbo 4-cylinder engine that delivers 248 horsepower and 258 lb-ft of torque. If you're wanting a more powerful ride, then you could get the available 3.0L TwinPower Turbo 6-cylinder. This engine produces 355 horsepower and 365 lb-ft of torque, which would help you move about easily.

When it comes to fuel economy, the vehicle achieves up to an EPA-estimated 23 city/30 highway MPG. It makes it one of the most fuel-efficient automobiles in its class, and it'll help you save money at the fuel pump in the long run.

FEATURES TO ELEVATE THE BMW'S PERFORMANCE

There are various features that can help enhance the SUV's performance, such as the available Dynamic Damper Control. It'll adjust the shock absorbers from the softest to firmest settings instantly. As a result, you get to choose what kind of ride you want, be it smooth and comfortable for cruising down the highway or sporty and firm for a more thrilling drive.

In addition, the X3 can easily handle any type of road due to the available xDrive intelligent all-wheel drive (AWD) system. It'll continuously monitor road conditions to determine when AWD is needed. Then, it'll send power to the wheel with the surest footing, giving you optimum traction on even the slickest surfaces.

TEST DRIVE THE 2019 BMW X3

With a stylish design, long list of features, and impressive performance, the 2019 BMW X3 has the makings of an ideal SUV. If you're still not sure if it's the one for you, then you'll need to see it in person and even take it for a spin.

To do just that, simply schedule a test drive at your local BMW dealership today!
