

BUYER'S GUIDE TO THE 2020 RANGE ROVER EVOQUE

5010 Alameda Blvd NE, Albuquerque, NM 87113 • 505-797-3600

ABOVE & BEYOND
LAND ROVER ALBUQUERQUE

With the 2020 Land Rover Range Rover Evoque, you get an SUV that's high in style, technology, and performance. This is shown through its many offerings, which we'll cover below.

In this *Buyer's Guide to the 2020 Range Rover Evoque*, we'll give you an inside look into what this automobile can provide to drivers like yourself. By reading this in-depth eBook, you can determine if the vehicle is right for you.

Keep reading to learn all about the car, then contact your local Land Rover dealership to see it in person.

A Bold Exterior

The 2020 Range Rover Evoque has an exterior that quickly makes its presence known on the road. How? Well, it offers a dramatic silhouette with a rising waist that's combined with a pronounced shoulder and prominent wheel arches.

The vehicle then adds a contemporary flair with its slim LED headlights and flush deployable door handles. Plus, you have lots of rich body colors to choose from, such as:

- Kaikoura Stone
- Silicon Silver
- Firenze Red

Furthermore, the Evoque offers a First Edition body style, which comes with 20-inch 5-split-spoke 'Style 5079' wheels. You'll also find a Gradated Linear Dark Aluminum trim with First Edition script, showcasing this vehicle's unique design.

A Refined Interior

Inside the 2020 Evoque is a clean and chic cabin that offers simple, elegant lines. Plus, you'll find both traditional and contemporary materials balancing each other out nicely.

Some of the fabrics that you can find inside the Evoque are:

- Windsor leather
- Kvadrat premium wool blends
- Eucalyptus fiber textiles

These materials are all sustainable and responsibly sourced. They're breathable as well. So, not only will they leave you feeling quite comfortable, but they also help create a truly sophisticated space.

Comfortable Amenities

Not only does the Range Rover Evoque interior look good, but it's filled with plenty of creature comforts to help keep you happy.

First up, there are the standard 10-way electric front seats, while 16-way electric memory front seats are available. With either option, you can quickly find your ideal position behind the wheel. Then, with the available memory function, you and another person can conveniently save your seating and mirror settings for future use.

Additionally, heated and ventilated front seats are available, helping to warm you up or cool you down when needed. You could also get heated rear seats and a heated steering wheel put into the automobile. Your backseat passengers will be happy in the chillier months, while your hands can be soothed throughout your commutes.

Lots of Passenger & Cargo Room

Whether you're at the wheel, riding shotgun, or relaxing in the back seat, you can enjoy having plenty of room to stretch out.

The Land Rover Range Rover Evoque offers lots of space for five people. This is evident through the following interior dimensions:

- **Front headroom/legroom:** 38.9 inches/40 inches
- **Rear headroom/legroom:** 38.3 inches/33.8 inches

The SUV also offers a fixed or sliding panoramic roof. It'll open up the cabin while letting in the glow of the sun or stars. Plus, the sliding feature lets you take in some fresh air during your drives.

Not only does the Evoque offer plenty of passenger room, but it offers lots of cargo space as well.

When the rear seats are up, you'll have 21.5 cubic feet to work with. Need a bit more room? Fold down one or two sides of the 40:20:40 rear bench. You can pack in those bigger items while still leaving room for a passenger or two. If you then need to maximize cargo room, simply fold that entire row down for 50.5 cubic feet of space.

Cutting-Edge Technologies

Whether you're riding solo or have a packed car, you can enjoy the various high-tech features offered inside the 2020 Range Rover Evoque.

The vehicle comes standard with a Touch Pro infotainment system. All your media options are easily accessible on the 10-inch touchscreen, which has the same tapping and swiping motions that you'd find in a smartphone or tablet. Plus, the home screen is fully customizable, allowing you to have your most used functions front and center.

Upgrade to a higher trim level and get the Touch Pro Duo infotainment system. You'll then have two 10-inch touchscreens to interact with various functions simultaneously. So, if you wanted to listen to the available SiriusXM® Satellite Radio while adjusting the cabin temperature, you could do so at the same time.

You can even access your smartphone's apps thanks to the standard Land Rover InControl® Apps™. By plugging your phone into the car's USB port, your contacts, calendar, and more will appear on the touchscreen. You can then perform various actions without needing to mess with your phone while driving—making things as convenient and safe for you as possible.

Advanced Safety Features

The technologies inside the Range Rover Evoque can also provide you great peace of mind on the road.

With the vehicle's driver-assisting technologies, you'll be alerted to hazards you might miss while driving. Some of the systems can even step in to take action if you're unable to do so.

- **Emergency Braking:** Warns you when a potential collision is imminent. If you're not able to hit the brakes in time, the system can intervene to help avoid an accident.
- **Lane Keep Assist:** Can gently steer the vehicle back if it starts to unintentionally drift out of your lane.
- **Driver Condition Monitor:** Monitors braking and steering patterns to detect if you're starting to feel drowsy. If needed, it'll send an early warning for you to take a break.

There are even more driver-assisting technologies available that can help with a variety of actions, such as parking.

The optional Park Package comes with features like Park Assist and a 360° Parking Aid. The former will automatically steer the car into a parking spot while you work the gear shifter and pedals. The latter will send visual and audible alerts if you're getting too close to an object, so you can better maneuver in tight spaces.

Dynamic Performance

While the safety features in the Evoque can help prevent collisions, you can also depend on the vehicle's overall performance for your everyday commutes.

For instance, the SUV comes standard in All Wheel Drive. This system can automatically distribute torque between the front and rear wheels when the road is a bit slick. As a result, you can feel confident traveling on any terrain in the Evoque.

The vehicle offers a powerful performance, too, thanks to its two engines:

- **2.0L 4-cylinder:** 246 horsepower and 269 lb-ft of torque
- **2.0L turbocharged 4-cylinder:** 296 horsepower and 295 lb-ft of torque

Both engines are then paired with a 9-speed Automatic Transmission for smooth shifting. Combine that with an EPA-estimated 20 city/27 highway MPG or 21 city/26 highway MPG fuel economy rating, and you're looking at a performance you can enjoy for hours on end.*

Off-Roading Capabilities

However, this Range Rover model really shines when going off the beaten path. Why? Well, it offers lots of useful features for off-road traveling!

One of those features is the standard Terrain Response® 2. This system automatically chooses the appropriate driving mode for you. Whether you're driving over grass, mud, or sand, this intuitive system can help you travel in that environment easily.

You can even drive through water, if you'd like, with the available Wade Sensing feature. The car has a wading depth of up to 23.6 inches. If the water is approaching that point, the vehicle will send an alert so you can act accordingly.

Furthermore, you can see the ground under the car thanks to the available ClearSight Ground View. You'll get a camera view of the front underside of the automobile. It lets you virtually "see through" the hood with the images appearing on the car's touchscreen. You can then check for any obstructions and drive around them.

Test Drive a 2020 Range Rover Evoque

Now that you know what the 2020 Range Rover Evoque has to offer, it's time to see it in person.

Schedule a test drive with your local Land Rover dealership to take this luxury subcompact SUV for a spin. Test its performance and features and see if the vehicle works with your lifestyle.

Don't wait. Test drive the Evoque today!
